Career Summary

Mission-focused IT professional with a Master of Science in IT Management and a Top Secret / CI Polygraph clearance. Offers extensive experience in federal contracting and systems administration, specializing in the design, deployment, and configuration of enterprise-wide server infrastructures and high-availability clusters. Proven ability to streamline IT operations through PowerShell automation, monthly patching protocols via MECM and BigFix, and the creation of standardized SOP documentation to ensure strict regulatory compliance. Proficient at aligning IT strategy with organizational objectives to deliver secure, reliable systems in high-stakes environments.

Education & Training

Master of Science, IT Management | Western Governors University | *September 2025*

Bachelor of Arts, History of Science | Idaho State University |

August 2020

Microsoft PowerShell Fundamentals Training & Certificate | *July 2025*

Windows Server 2025 Innovations & Updates Training & Certificate | *October 2025*

Professional Experience

Edgewater Federal Solutions | Windows Systems Engineer | *April 2025 – Present*

- Built and deployed new server environments for enterprise infrastructure
- Configured server clusters and fail-safes
- Automated processes using PowerShell and GitLab across multiple domains
- Collaborate with cross-functional infrastructure teams to resolve complex enterprise issues
- Created standardized documentation and SOPs for infrastructure processes
- Resolved user requests and issues for DNS, DHCP, and domain issues
- Managed monthly patching procedures, deploying updates to infrastructure servers using MECM and BigFix over multiple domains, managed quick fixes and needed remediation, and documented the process
- Created enterprise dashboards using Grafana and Zabbix to track server vitality

Peraton | Senior Systems Associate & Watch Officer | *November 2023 – April 2025*

- Resolved user requests and issues for printers across enterprise infrastructure
- Oversaw enterprise-wide critical ticketing operations, monitoring networks, collaborating across teams to resolve high-priority issues
- Created SOPs and training documentation, onboarded and trained new Systems Administrators, and ensured regulatory compliance.
- Supported integration of hardware/software solutions while maintaining compliance with government security requirements

PAE/Amentum/EM Key Solutions, INC. | FOIA Analyst / Government Information Specialist |

October 2021 – November 2023

- Supported FOIA and Privacy Act requests for government clients, processing high volumes of confidential documentation.
- Coordinated interagency communication while adhering to strict confidentiality and legal guidelines.
- Drafted correspondence, processed litigations, and maintained case records with meticulous accuracy.
